

Key management solutions for automotive dealers

Improve dealership efficiency with intelligent key and asset control

Since 1992, KEYper Systems delivers innovative key and asset control solutions worldwide. Renowned for reliability, we offer tailored solutions across diverse industries.

As part of ASSA ABLOY Global Solutions, we contribute to reimagining experiences through cutting-edge security solutions, ensuring exceptional value and user experiences. Our security spectrum, from traditional boards to electronic cabinets, reflects our commitment to utmost security and efficiency.

Established in 1995, Traka, an ASSA ABLOY company, is the global leader in intelligent management solutions for keys and equipment. Our solutions help all types of organizations better control their important assets, improving productivity and accountability, and reducing risk in critical processes.

In 2019 ASSA ABLOY acquired KEYper Systems, a leading supplier of electronic and mechanical key management systems in the US with a strong presence in the automotive segment. KEYper became a separate business unit of Traka following the acquisition.

Designed for automotive

Our electronic key management systems are designed, built and configured to meet the unique requirements of automotive operations, making it the most effective solution for electronic key control in the automotive industry.

Sell more cars

Keep your staff focused on sales, and reduce the time and effort spent tracking down vehicle keys. Easily manage and monitor sales staff activity, and get customers out test driving vehicles faster than ever before.

Improve workshop efficiency

Provide fast and secure key access for workshop technicians to streamline service operations, and create more efficient intake, service, and after-sales processes with total accountability.

Maximize profits

Reduce downtime for all departments handling your inventory by ensuring vehicle keys are always accounted for and readily available. Monitor and audit all key access for greater management visibility and reduce inventory damage, loss, and misuse.

Increase security

Audit all system activity to easily track key and vehicle movement between users, departments, and locations. Use flexible reporting functions to empower your business, using daily transactional data to gain valuable insights into your operations.

Raise CSI scores

Reduce unnecessary errors and delays in your sales and service processes. Give your staff the tools they need to work efficiently and effectively, and the time to focus on what matters most - improving the customer experience.

Electronic key management

KEYper MX puts you in control

The straightforward solution for efficient vehicle key management.

KEYper MX ensures efficient, secure, and transparent key management tailored to the dynamic needs of automotive environments, optimizing workflows and enhancing overall operational efficiency.

The system ensures only authorized users can access keys, whilst maintaining a complete audit trail of every transaction, tracking who accessed each key, when, and for what purpose.

Manage up to 8 cabinets and over 2,500 keys on a single system!

Three cabinet options for any application.
Each cabinet can be expanded in increments of 32 key positions.

Is your sales process hitting a roadblock due to missing dealer plates?

The KEYper Dealer Plate Extension Cabinet provides a simple way to add lock-in control over dealer plates to your existing MX system. Whether your plates are pooled or assigned to specific sales personnel, they can be quickly checked out in the same transaction as vehicle keys for a more secure and efficient process.

Add Dealer Plate Panels to any MX key cabinet

MX Mini

Key positions: 32

Dimensions (H/W/D in mm)
Cabinet: 381 x 686 x 318
Wall mounted: 451 x 737 x 330

Cabinet weight: 27.2 kg

MX Small

Key positions: 32-128

Dimensions (H/W/D in mm)
Cabinet: 635 x 686 x 318
Stand mounted: 1750 x 686 x 318

Cabinet weight: 40.8 kg

MX Large

Key positions: 32-288

Dimensions (H/W/D in mm)
Cabinet: 1245 x 686 x 318
Stand mounted: 1750 x 686 x 318

Cabinet weight: 69.9 kg

Utilize the Dealer Plate Extension Cabinet with any MX system

Having better control and faster access to dealer plates is great for your sales staff and your customers.

Secure and manage access to 8-32 plates per cabinet

Each plate is locked in place and only released to authorized users

Plates and keys can be checked out in one seamless transaction

Can also add lock-in control over sensitive, high-security keys

Unparalleled physical protection for keys

Where there's no compromise for physical security, KEYper HS has you covered.

KEYper HS is the latest addition to our electronic range of key cabinets. Accredited to EN 1143-1 standards, KEYper HS is the only electronic key control system on the market offering unmatched security and peace of mind within a secure-rated enclosure.

HS systems combine cutting-edge technology with the highest security certification to meet the most strict insurance requirements in the market, making it the ideal choice for robust security and effective vehicle key management.

All the smart administration tools you'd expect from KEYper

KEYper HS systems utilize the same advanced technology and software platform as the world-leading KEYper MX solution, giving dealers all the powerful administration and reporting functions needed for effective key management.

Easily manage inventory access with total control, improved visibility, and an audit of every transaction for total accountability. Pull inventory data directly from your DMS platform to streamline administration and drive efficient and accurate processes.

Key features

EN 1143-1 certified safe enclosure

Unparalleled durability and security against physical attempts to breach cabinet exterior

EN-1300 Class-B night lock

Designed for the resistance of destructive attacks and manipulations using mechanical or electronic tools

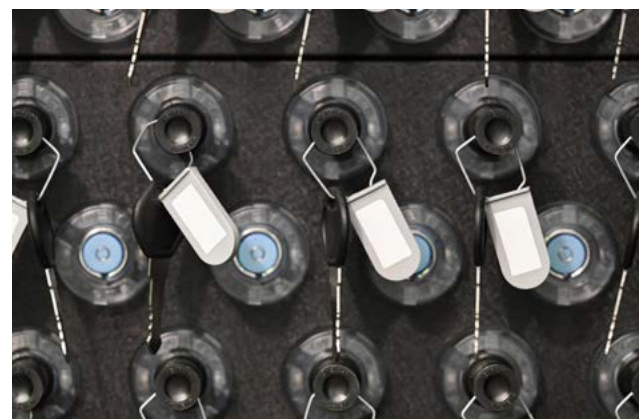

Insurance compliance

Construction and security features meet the most demanding requirements for most insurance providers

Flexible capacities

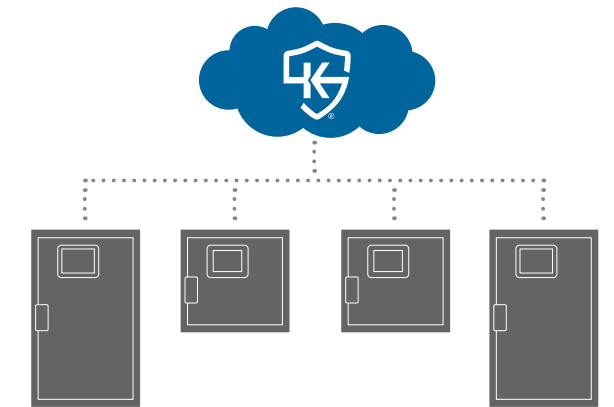

- Standard cabinet: 128 key positions
- Large cabinet: 288 key positions
- Add-on cabinets: 2,500+ key positions on a single system

The KEYper ecosystem

The cornerstone of KEYper's automotive solutions is the ability for your staff to return keys to any key position, in any system, at any location. This means KEYper can more closely audit vehicle activity as they move throughout your business.

Upon keys being returned to a cabinet, both the key and vehicle locations are immediately updated, enabling the next user to find them instantly.

Simple architecture

The embedded software requires no additional server to be installed or maintained. Administrators can access the browser-based management software from any PC.

DMS integration

KEYper can pull data directly from your Dealer Management System to synchronize vehicle records and eliminate the time-consuming task of manual data entry.

Flexible authentication

KEYper offers different methods for authenticating users to meet the unique needs of your business. Use existing card credentials for convenience, the biometric fingerprint reader increased security, or assign users a PIN code to meet temporary access needs.

Intuitive touchscreen

Our cabinet software is uniquely designed for the workflows of the automotive industry to deliver a fast, simple, and enjoyable user experience. Your staff will find a familiar and friendly touchscreen experience to quickly access the assets they need.

More than just keys

KEYper offers the ability to manage more than just vehicle keys, with accessories to secure and track access to EV fobs, access cards, fuel cards, and more.

KEYper Sturdi Fob

Every key is attached to a KEYper Sturdi Fob, which is easily removed from the key panel using a simple twist. Each Sturdi Fob is uniquely identified to the MX/HS system, and its activity recorded any time it is removed or returned to the key cabinet.

KEYper Elite helps every key movement drive efficiency and profitability

Our administration software works with KEYper MX and HS systems, and allows your dealership to generate revenue with every key movement by reducing exposure, increasing accountability, and optimising daily operations.

See real-time system activity, including which keys are out of the system, who accessed them, and for what reason. Access a complete history of every transaction and run custom reports on activity for your all your vehicles and users.

KEYper puts you in control, even when you're not there

Beyond the onsite security and convenience of KEYper MX and HS key cabinets, our web-based administration software delivers total control and visibility of your inventory from any computer.

- Manage and monitor all users, assets, and vehicle data from anywhere
- Set curfews to determine how long keys are allowed to be out of the system, or a specific time of day they must be returned
- Receive immediate email alerts for important events, such as an overdue key or a cabinet door being left open

Transaction auditing - Every transaction is meticulously recorded for total visibility and accountability.

Inventory visibility - Perform fast inventory audits to ensure every vehicle is accounted for.

Administrative efficiency - Automatically email reports on specific vehicle activity for periodic inventory monitoring.

Reduce downtime - Provide real-time key and vehicle location information to technicians for more efficient workshop processes.

Total managed solution for increased security, maximum uptime, and effortless administration

Gain administrative ease and convenience through our software-as-a-service option, by letting KEYper host and maintain your database and system software. Enjoy KEYper MX and HS as a turnkey solution, without having to worry about securing your data, backing up your database, or upgrading the cabinet or administration software.

- Remotely access and monitor your system from anywhere in the world
- Receive software updates as soon as they're available
- Maximize uptime with secure database backup and restoration service
- Your data is safely hosted on KEYper's dedicated secure servers

KEYper GO puts your entire key inventory in the palm of your hand!

Every SaaS solution includes our mobile administration app, KEYper GO!

Your managers and staff require convenience and efficiency in accessing the keys they require each day. KEYper GO brings all the powerful tools needed by users and administrators of your KEYper system right to their smartphone or tablet.

Your staff will no longer need to return to the cabinet to know if a key or dealer plate is available. They can identify who has an item checked out, contact them at the press of a button, and even transfer ownership of an asset in the field.

With KEYper GO, administrators gain everything needed for efficient system management

- Receive immediate push notifications for important system activity
- Check current system and item status
- See complete transaction history
- Manage users and items
- Manage access permissions
- Create key reservations
- And more

KEYper's value beyond the cabinets

KEYper MX and HS systems offer a comprehensive suite of features that go well beyond streamlined key management. They can also enhance operational productivity, security, and customer satisfaction giving your dealership a competitive advantage.

Here are some additional system benefits you may not have thought of:

Reduce risk exposure - Ensure keys are not out longer than needed, and gain immediate visibility for any vehicle not returned on time.

Drive sales - The faster your staff can locate and access keys, the more demos can be completed per day and the sooner your customers can get behind the wheel of their new car.

Assess performance - Measure team and individual productivity, helping to identify and reward high performers.

Automate oversight - Eliminate manual processes for distributing, monitoring, and tracking key access, and allocate more time for serving your customers.

Build customer confidence - Knowing their keys are tagged, tracked, and handled efficiently, service customers will appreciate more secure and expedient processes in your workshop.

KEYper brings better security, accountability, and efficiency to your dealership

Secure and manage access to vehicle keys

Gain control and visibility over every dealer plate

Easily take inventory of every car on your premises

Maintain an audit trail with detailed analytics

Drive efficiency & increase productivity

- Make it easier for staff to identify keys, locate vehicles, and view vehicle information
- See who currently has a key checked out, and view their contact information
- Identify and tag vehicles which are blocked in, and quickly check out all the keys needed to access it in a single, efficient transaction
- Create streamlined workshop processes for the intake/discharge of customers vehicles, saving valuable time on every service appointment.

How much can KEYper save your business?

Example ROI calculation: Workshop productivity improvements

Number of technicians (15) × 10 minutes lost per day looking for keys	: 15 × 10 = 150 (2.5 hours)
Multiply hours lost by average labour recovery rate	: 2.5 × £70 = £175 loss per day
Average loss per month	: £175 × 5 days × 4 weeks

Total loss per month : £3,500

Intelligent software features for streamlined key management

Real-time key status

Instantly identify if a key is checked out by another user, and view their contact details for easy communication and coordination.

Issue reasons

Require staff to select from a list of reasons upon key checkout to record the reason for every transaction.

Comprehensive search

Enhance operational efficiency by locating keys quickly by VIN, stock number, year, make, model, interior or exterior colour, and more.

Parking location capture

Require staff to enter the parking location when returning keys so the next user knows where to find the vehicle.

Detail auditing

Every transaction is recorded, providing a comprehensive audit trail of all key activities, including who accessed each key and when.

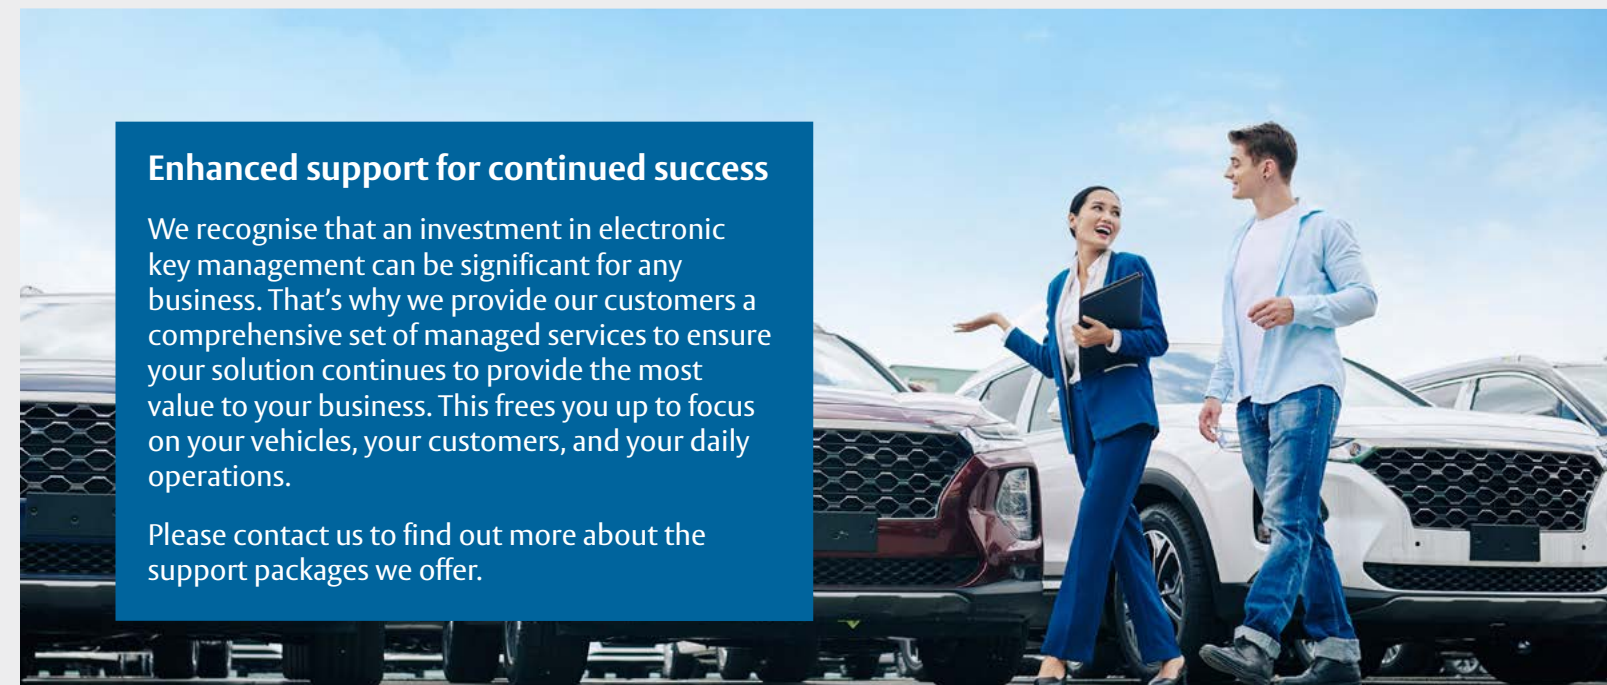

Lot blocking

This feature helps quickly identify vehicles that may be blocked in, allowing users to check out all necessary keys to access the vehicle.

Enhanced support for continued success

We recognise that an investment in electronic key management can be significant for any business. That's why we provide our customers a comprehensive set of managed services to ensure your solution continues to provide the most value to your business. This frees you up to focus on your vehicles, your customers, and your daily operations.
