

Key management solutions for automotive dealers

Improve dealership efficiency with intelligent key and asset control

Designed for automotive

Our electronic key management systems are designed, built and configured to meet the unique requirements of automotive operations, making it the most effective solution for electronic key control in the automotive industry.

Sell more cars

Keep your staff focused on sales, and reduce the time and effort spent tracking down vehicle keys. Easily manage and monitor sales staff activity, and get customers out test driving vehicles faster than ever before.

Improve workshop efficiency

Provide fast and secure key access for workshop technicians to streamline service operations, and create more efficient intake, service, and after-sales processes with total accountability.

Maximize profits

Reduce downtime for all departments handling your inventory by ensuring vehicle keys are always accounted for and readily available. Monitor and audit all key access for greater management visibility and reduce inventory damage, loss, and misuse.

Increase security

Audit all system activity to easily track key and vehicle movement between users, departments, and locations. Use flexible reporting functions to empower your business, using daily transactional data to gain valuable insights into your operations.

Raise CSI scores

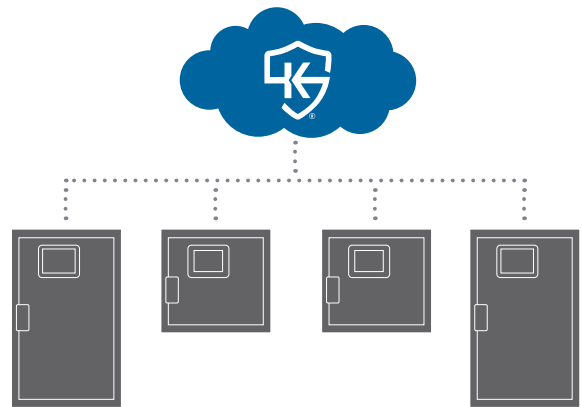

Reduce unnecessary errors and delays in your sales and service processes. Give your staff the tools they need to work efficiently and effectively, and the time to focus on what matters most - improving the customer experience.

KEYper MXu system features

The KEYper ecosystem

The cornerstone of KEYper's automotive solutions is the ability for your staff to return keys to any key position, in any system, at any location. This means KEYper can more closely audit vehicle activity as they move throughout your business.

Upon keys being returned to a cabinet, both the key and vehicle locations are immediately updated, enabling the next user to find them instantly.

Simple architecture

Designed to operate in all environments, from standalone desktop PCs to virtual servers with multiple instances of the Traka Automotive application

DMS integration

Direct integration with popular DMS platforms to synchronize vehicle records, with ability to interface with bespoke databases to provide real-time key and vehicle information

Flexible authentication

KEYper offers different methods for authenticating users to meet the unique needs of your business. Use existing card credentials for convenience, the biometric fingerprint reader increased security, or assign users a PIN code to meet temporary access needs.

Intuitive touchscreen

Our cabinet software is uniquely designed for the workflows of the automotive industry to deliver a fast, simple, and enjoyable user experience. Your staff will find a familiar and friendly touchscreen experience to quickly access the assets they need.

Improved parking locations

KEYper MXu allows users to input a vehicle's parking location when returning a key to the cabinet, so the next driver will know exactly where to find it.

Traka iFob

Every key is attached to the durable, reliable, and entirely maintenance-free Traka iFob. The new range of KEYper MXu cabinets have been designed to integrate seamlessly with existing 16-bit solutions and your existing Traka iFobs.

Electronic key management

KEYper MXu puts you in control

The straightforward solution for efficient vehicle key management.

KEYper MXu ensures efficient, secure, and transparent key management tailored to the dynamic needs of automotive environments, optimizing workflows and enhancing overall operational efficiency.

The system ensures only authorized users can access keys, whilst maintaining a complete audit trail of every transaction, tracking who accessed each key, when, and for what purpose.

Three cabinet options for any application.
Each cabinet can be expanded in increments of 32 key positions.

MXu Mini

Key positions: 32

Dimensions (H/W/D in mm)
Cabinet: 381 x 686 x 318
Wall mounted: 451 x 737 x 330

Cabinet weight: 27.2 kg

MXu Standard

Key positions: 32-128

Dimensions (H/W/D in mm)
Cabinet: 635 x 686 x 318
Stand mounted: 1750 x 686 x 318

Cabinet weight: 40.8 kg

MXu Large

Key positions: 32-288

Dimensions (H/W/D in mm)
Cabinet: 1245 x 686 x 318
Stand mounted: 1750 x 686 x 318

Cabinet weight: 69.9 kg

Manage up to 8 cabinets and over 2,500 keys on a single system!

Control key access

Protect keys and assets when not in use, and limit access to the right people at the right times

Automate processes

Eliminate manual oversight in managing and documenting access to vehicle keys

Create accountability

Your staff will behave more responsibly knowing all transactions are recorded electronically

Audit all activity

You'll know who removed every item, why it was accessed, and when it was taken/returned.

Enhanced protection after hours, or anytime you need it.

KEYper's High-Security Lock and Hasp provides an added layer of physical security for your electronic key system, and acts as a stark visual reminder that your keys are heavily protected at all hours.

The lock body design conceals the shackle, defeating any attempts to pry and cut. The powder-coated steel, fully shielded hasp shroud provides maximum protection against attempts at removing the lock by blunt force, drilling, sawing or prying.

The lock set is custom manufactured for a perfect fit on any new or existing MX or MXi key cabinet. The lock set is easy to install on existing systems in just a few minutes, with an instructional video to walk you through the process.

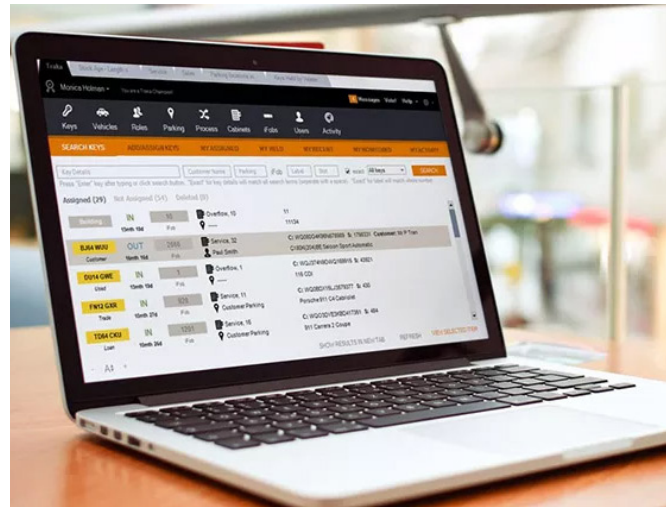

eTag Automotive software

eTag software helps every key movement drive efficiency and profitability

Our administration software works with KEYper MXu and Traka 16-bit cabinets, and allows your dealership generate revenue with every key movement by reducing exposure, increasing accountability, and optimising daily operations.

See real-time system activity, including which keys are out of the system, who accessed them, and for what reason. Access a complete history of every transaction and run custom reports on activity for your all your vehicles and users.

Traka, powered by KEYper, puts you in control, even when you're not there

Our quick and easy reporting provides you visibility of vehicles which aren't being demoed, or unauthorised vehicle access outside of normal business hours.

Reporting insights help improve control:

- Visual heat maps within reports quickly display the information you need
- Quickly generate reports to show movements for any key, user or specific timeframe
- Reports can be exported to Excel for further processing

Quick and easy reporting

Extract valuable and actionable data from your dealership activities to help improve operations.

See which vehicles aren't being demoed, which are being used excessively, or the reasons for access. Quickly view activity for specific keys or users at certain times, or export custom reports in Excel format for more detailed analysis.

Transaction auditing - Every transaction is meticulously recorded for total visibility and accountability.

Inventory visibility - Perform fast inventory audits to ensure every vehicle is accounted for

Reduce downtime - Provide real-time key and vehicle location information to technicians for more efficient workshop processes.

Traka's Automotive value beyond the cabinets

Drive efficiency & increase productivity

- Make it easier for staff to identify keys, locate vehicles, and view vehicle information
- See who currently has a key checked out, and view their contact information
- Identify and tag vehicles which are blocked in, and quickly check out all the keys needed to access it in a single, efficient transaction
- Create streamlined workshop processes for the intake/discharge of customers vehicles, saving valuable time on every service appointment.

Intelligent software features for streamlined key management

Real-time key status

Instantly identify if a key is checked out by another user, and view their contact details for easy communication and coordination.

Comprehensive search

Enhance operational efficiency by locating keys quickly by VIN, stock number, year, make, model, interior or exterior colour, and more.

Detail auditing

Every transaction is recorded, providing a comprehensive audit trail of all key activities, including who accessed each key and when.

Parking location capture

Require staff to enter the parking location when returning keys so the next user knows where to find the vehicle.

Enhanced support for continued success

We recognise that an investment in electronic key management can be significant for any business. That's why we provide our customers a comprehensive set of managed services to ensure your solution continues to provide the most value to your business.

Our dedicated automotive account managers are always on hand to support your business, allowing you to focus on your vehicles, your customers, and your daily operations. Please contact us to find out more about the support packages we offer.
